Join urban leaders and innovators from over 50 countries on June 7-9, 2017 in Incheon Songdo, the world's most innovative new city as they discuss the theme Thriving Cities: The Building Blocks of Urban Wellbeing. Incheon Songdo provides a unique and dynamic backdrop for one of the most critically important conversations of our time: the future wellbeing of our cities and those who live in them.

The Summit brings together the top entrepreneurs, innovators, change-makers, CEOs, policy makers, investors and thinkers on urban innovation. New Cities is an international nonprofit organization dedicated to improving life in cities, and is focused on people, places and policies. We bring together a global network of public and private sector leaders and Urban Tech innovators to foster results-oriented collaboration.
