Next Tuesday, July 12th, on the margins of the UN High-level Political Forum, CHANGE and Metropolis will launch our 2022 Voluntary Gender Review (VGR). The VGR is a first-of-its-kind network progress report on SDG 5: Achieve gender equality and empower all women and girls. This report summarizes concrete actions local governments can take to accelerate and measure progress towards gender equality. The launch event, co-hosted by Metropolis, will bring together city leaders from around the world to share experiences and promote solutions to gender inequality that draw from our individual strengths and collective impact.
