Smart City Expo USA is a White House Summit for Democracy Year of Action initiative. Our partners include Fira Barcelona, the National League of Cities, the African American Mayors Association, and our host, Miami Mayor and U.S. Conference of Mayors President, Francis Suarez.

We are expecting 100+ speakers and 3000 highly-curated attendees. Smart City Expo USA is committed to redefining “smart”. From the invisible threats of cybersecurity, climate change, pandemics, and AI to the billions of dollars of federal funding for transportation, electrification, waste and water, broadband, and

more. We are futureproofing our cities while addressing historic inequities.
