Smart City Expo LATAM Congress

23 May. 2023
25 May. 2023

Viable projects, real impacts

During the three days of the congress, invited speakers and experts will share knowledge and debate on different topics covering initiatives, programmes and solutions that respond to the present needs and future

challenges of Latin American cities.

In the framework of the congress, will also take place Smart Fest, a festival that arises from the pressing need to link all citizens in the sustainable solutions that our planet needs through collaboration, innovation and technology. This festival seeks to make people aware and involve them in the challenges and solutions, through technology and innovation, to have better environments in which to live through activities that motivate them to design and co-create solutions and proposals that respond to the challenges they face.
