Smart City Expo World Congress

07 Nov. 2023
09 Nov. 2023

Held in Barcelona since 2011, **Smart City Expo World Congress** is the world's biggest and most influential event for cities and urban innovation. Every year, the Smart City Expo gathers leaders from the most innovative companies, governments and organizations to move cities towards a better future. Their goal is to **collectivize urban innovation across the globe** and empower cities to face the critical challenges the world faces today.

The global population is expected to grow to 10B by 2050, and 70% of these people will live in cities. In 40 years, we will have built as many new cities as in all of human history. **The future of humanity is inevitably urban**, and digitization stands as an essential, unstoppable revolution to ensure future-proof cities focused on people and the environment. At the crossroads of tech and cities, there's an opportunity for a more sustainable and equitable world where new business and collaboration models arise. Smart City Expo

is the place to **catalyze a powerful urban tomorrow worldwide.**
