Breakthrough technologies for future governments

Governments are leveraging digital tools to rethink their interaction with their citizens and their cities. According to Gartner, **worldwide government IT spending reached \$565.7 billion** in 2022. Over the coming years this investment is predicted to grow exponentially. Modernizing operations and building resilient applications is not just a necessity, but also a huge opportunity to boost economic growth.

Connect with global leaders, innovators, and experts dedicated to advancing digital transformation in public services. Over 100 international figures confirmed. Important Dates - **Registration Deadline: 7 May, 2024**, and **Congress Dates: 21 - 23 May, 2024**.

G4I will offer:

1. High Impact Solutions
2. New Ways of thinking
3. Opportunities to create fruitful partnerships
