Ecocity World Summit 2019

07 Oct. 2019
11 Oct. 2019

The Ecocity World Summit is the longest-standing international conference that addresses building cities in balance with nature. It is a biennial event involving over 1000 delegates from around the world. The first conference in this series was held in Berkeley, USA in 1990 with the purpose of bringing together bright minds to share knowledge on ecological and sustainable city designs.

This year, the conference will be hosted by the British Columbia Institute of Technology (BCIT) in collaboration with the City of Vancouver and Tourism Vancouver at the Vancouver Convention Centre West from October 7-11, 2019. Ecocity 2019 will consist of keynote and guest speakers, presentations, and local field trips highlighting features of sustainable city design, construction and operation.

The 2019 conference will bring focus to the International Ecocity Standards (IES) which were developed through a decade-long partnership between Ecocity Builders and BCIT School of Construction and the Environment. The IES has 18 standards pertaining to sustainable urban living grouped under:

- Urban design
- Bio-geophysical conditions

- Socio-cultural features
- Ecological imperatives

Don't forget to register before June 14th.
