In line with the 2018-2020 Action Plan, Metropolis launched the System of Metropolitan Indicators (SMI) with the purpose of strengthening capacities for metropolitan governance. The SMI is a set of 38 metropolitan indicators resulting from comparative research, conducted by LSE Cities, that makes it possible to analyse and compare the reality of 69 members.

Today we open a tender to identify, collect, and analyze the key gender metropolitan indicators, detecting the most important gaps in coherence with the strategic vision of Metropolis.

**Applications will be considered until the 13th of December 2019**

Please, find all the details [here](#).
