

World Forum on Peripheral Cities

31 Dec. 2020

31 Dec. 2020

Date to be confirmed

The Forum brings together the members of the worldwide network 'Cities in the periphery & participatory democracy'. It shows the need for recognition of the social and political situations of peripheral cities within their conurbations and within the world of cities. This does not mean opposition to the 'capital city', but rather that it is necessary to question and rethink the notion of 'centrality' in these urban zones.
