City Managers Community 2020: green infrastructures webinar

16 Jul. 2020
16 Jul. 2020

The **Metropolis City Managers Community** is loaded with new and dynamic activities in 2020. This year, Metropolis is fostering the engagement of the top leaders from our membership who are in charge of the day-to-day management of green infrastructure - in the various forms, functions, scales, and impacts that "green" can have in major metropolises.

This webinar is the second activity of the City Managers Community in 2020 and represents the intermediate step of a process which will culminate with the celebration of the 5th edition of the City Managers Days, scheduled for November 2020, in the framework of the Smart City Live 2020.

Exclusive to the representatives of the Metropolis membership who took part in the Green Infrastructure Metropolitan Portrait survey (open from 11 June to 6 July 2020), this online session will offer to a small group of people with similar responsibilities in their metropolises the opportunity to:

- get to know each other

- discuss the consolidated findings of the survey
- exchange additional information about their green infrastructure flagship projects
- delimit the topic and dynamics of the next activities, scheduled for November

Practical info

When: Thursday, July 16, at 12:30 UTC - Coordinated Universal Time (please check your corresponding local time here)

Where: online (via Zoom, with access link provided only to invited members)
