Smart City Expo World Congress

13 Nov. 2018
www.smartcityexpo.com

The Smart City Expo World Congress (13-15 November, Barcelona) is the **world's biggest event for cities**, and Metropolis is partnering with this leading platform as a Supporting Institution.

Now in its 8th edition, the event has become a global hub where **leaders of the most innovative cities, companies and organizations** come together to share ideas, present projects and solutions, and drive urban transformation to a sustainable and better future.

We would like you to join us at this key meeting point together with **over 20,000 professional visitors and top representatives from 700 cities**. It is the perfect platform to engage with decision makers from both public and private sectors, and learn from the best experts how to build more sustainable, inclusive and livable cities: **Cities to Live In**.

In this year's edition, the event intends to reflect on what makes a city livable, what happens when "gentrification" changes the whole social character of a neighborhood, and how sharing can transform the way it operates so that it can become more sustainable, resilient, inclusive and, of course, smarter with a focus on people.

To do so, this year's edition will focus on five main topics responding to the key issues facing cities:

- Digital Transformation
- Urban Environment
- Mobility
- Governance & Finance
- Inclusive & Sharing Cities

This dynamic approach, together with an extended exhibition area full of real solutions, is expected to outnumber 2017 figures and reinforce the smart community all over the world.
