Perspective.brussels, the Brussels Planning Agency, is organising the sixth and last episode of its series of **webinars on Urban density** on 29 June 4pm Brussels time.

This series is part of a season of reflection and production that perspective.brussels is devoting to the definition of a density that can rhyme with quality of life. This sixth episode will be an opportunity to discuss the urban economy with Rudiger Ahrend, focusing on the economic determinants of quality density. Rudiger Ahrend is Head of the Economic Analysis, Data and Statistics Division at the OECD. This final webinar will also draw the first lessons from our exploration of the contours of density and quality of life and outline some perspectives for the future.
