Seoul Human Resource Development Center

Seoul Human Resources Development Center (SHRDC) hosts MITI's Headquarters

Metropolis International Training Institute (MITI) is the onsite learning network that represents training centers from Metropolis membership globally.

MITI has the aim to strengthen the institutional and professional capacities of leaders from local and metropolitan authorities, scaling them up to the global level.

MITI counts on headquarters hosted by Seoul – SHRDC, and regional centers hosted by Cairo - HBRC, Mashhad - ISCO, and Mexico City – EAPDF, with the support and coordination of Metropolis World Secretariat.

Seoul Human Resources Development Center (SHRDC) was established in 1962, as an institute for providing training programs, promotion and recruitment exams for the public officials for the Seoul Metropolitan Government (SMG) and its 25 autonomous districts.

SHRDC developed best practices and policies of Seoul into training programs not only for the benefits of SMG's officials but also for the public officials of foreign cities & local governments.

Metropolis training & learning program aim to support the improvement of the skills and capacities of policy-makers and practitioners from among Metropolis members. Its objective is to provide the membership with firm support for the development of urban capacities, peer review processes and dialogue through a set of instruments that can promote the implementation of public policies and services, coordinated from the different levels of government acting on the same metropolitan territory.

Sustainable Water Management Training Program

SHRDC MITI Headquarters, 23-30 June 2019

■ Backgrounds

SDG Goal 6 : Ensure access to water and sanitation for all

Clean, accessible water for all is an essential part of the urban development. However, due to bad economics or poor infrastructure, many cities have challenges associated with inadequate water supply, sanitation and hygiene.

Therefore, cities and local governments should be able to manage the water quality from the water sources by applying scientific pollution control and measurement methods with focus on development of resilient and sustainable urban water infrastructures.

The program will help participants to learn about Seoul's water system – Arisu – which is the world's first water system accredited by the National Sanitation Foundation (NSF) and other major water resource management related policies of Seoul.

■ Outline (All programs will be delivered in English)

Title	Sustainable Water Management Training Program

Sustainable Urban Management Training Program

SHRDC MITI Headquarters, 22–29 September 2019

■ Backgrounds

SDG Goal 11: Make Cities Inclusive, Safe, Resilient and Sustainable

With the number of people living within cities projected to rise to 5 billion people by 2030, it's important that efficient urban planning and management practices are in place to deal with the challenges brought by urbanization.

Many challenges exist to maintaining cities in a way that continues to create jobs and prosperity without straining land and resources. Common urban challenges include congestion, lack of funds to provide basic services, a shortage of adequate housing, declining infrastructure and rising air pollution within cities.

Seoul, the capital city of Korea, owes its current existence to its time-honored history and culture. While promptly addressing urban issues from rapid growth, the Seoul Metropolitan Government has worked with the citizens of Seoul to come up with sustainable urban planning and restoration policies unique to the city. The program will introduce Seoul's best urban management policy such as Cheonggyecheon Restoration & Downtown Revitalization project (please visit <https://seoulsolution.kr/en/node/2374> for more information)

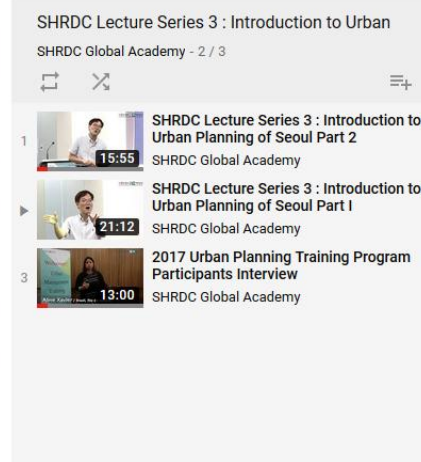

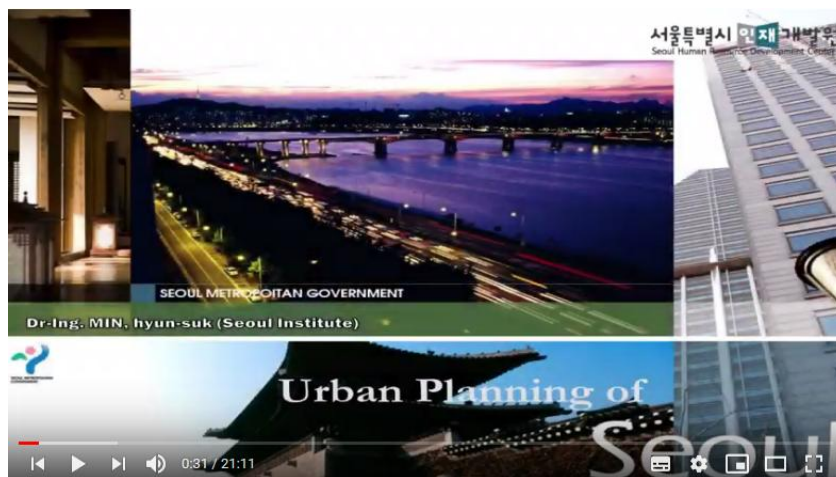

■ Outline (All programs will be delivered in English)

Sustainable Mobility Training Program

SHRDC MITI Headquarters

10–17 November 2019

■ Program Backgrounds

Sustainable transportation can enhance economic growth and improve accessibility of city. Sustainable transport achieves better integration of the economy while protecting the environment, improving social equity, health, resilience of cities, urban-rural linkages and productivity of rural areas. In the 2030 Agenda for Sustainable Development, sustainable transport has emerged as main issue across several SDGs and targets, especially those related to food security, health, energy, infrastructure, cities and human settlements.

Seoul has continued to update its infrastructure and related policies to be 'a People-oriented City of Sharing and Green Transportation'. Seoul's public transit system is one of the most preferred means of transport and the city's transportation policies are regarded highly in the world for the system's convenience, safety, timeliness and affordability. While sharing best policy and practice of Seoul, the program will also aim to put together insights and knowledge on sustainable mobility among others.
