

Workshop for Thought Leaders:

Innovation in Urban Transportation for the Future City

Date: 30 October - 3 November, 2017

Language: English

Participants:

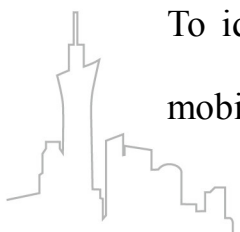

Preferably Mayors & Vice-Mayors. Also open to senior-level transport officials (directors, department heads)

Introduction:

As territories of cities keep growing and the distances of travel in urban areas continue to increase, constructing an efficient transportation system has become imperative for city managers from all around the world. This year's workshop brings together internationally renowned experts to share their knowledge and experiences in urban transportation innovations. Dialogues will be conducted among scholars and practitioners to reflect on and formulate principles for action plans that enhance the effectiveness and sustainability of urban transportation system and promote liveable communities.

Objective:

To identify, on the basis of peer-reviewed innovations in urban transport and mobility, the key principles that can guide the formulation and design of more

sustainable urban transport policies and practices.
