#01 Location of IAU - MITI RC Paris IdF

France: Gateway

France is a gateway to European capitals and countries around Mediterranean.

#01 Location of IAU - MITI RC Paris IdF

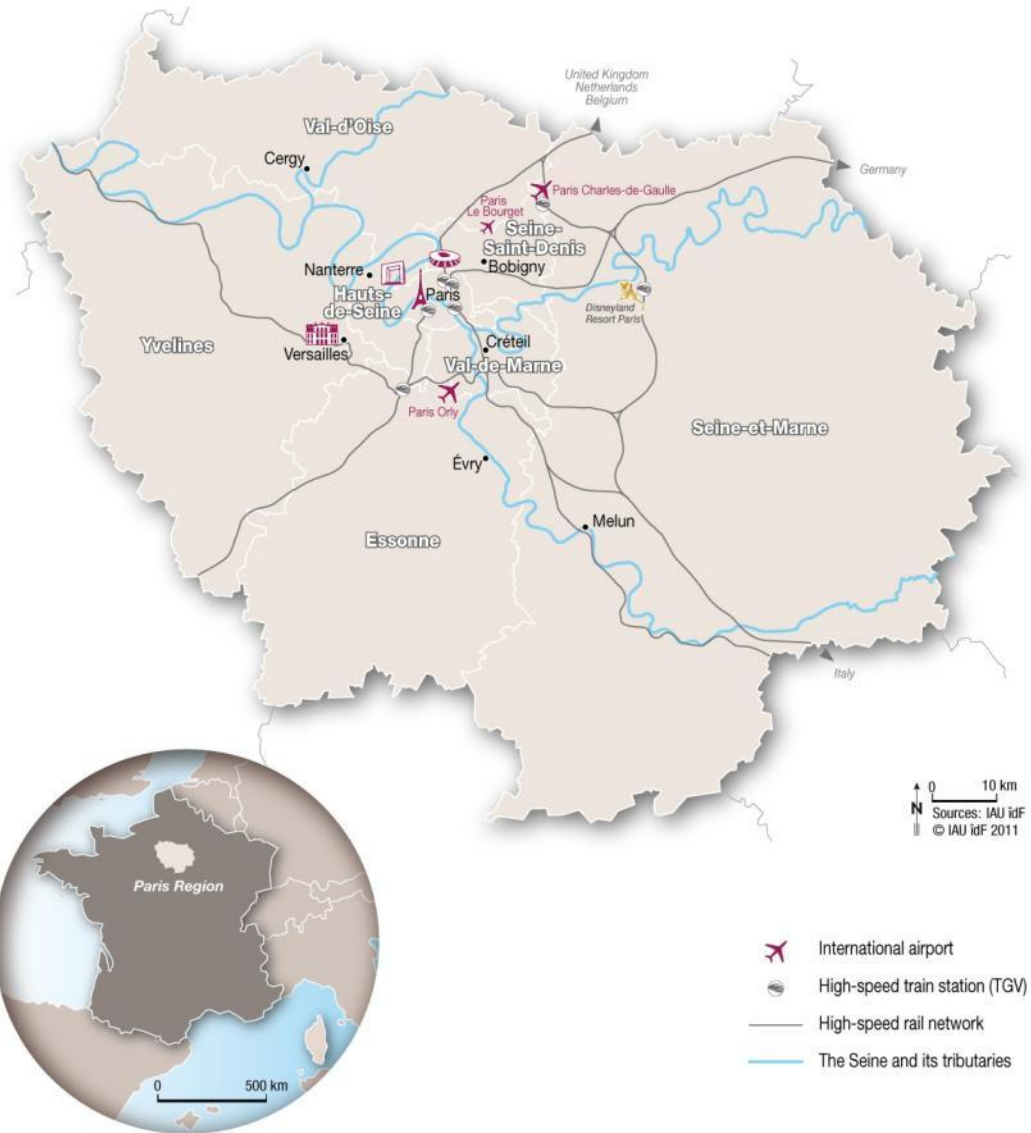

Île-de-France Paris Region: International Hub

- Two international airports:
 - Roissy Charles de Gaulle
 - Orly

One business airport

- Le Bourget

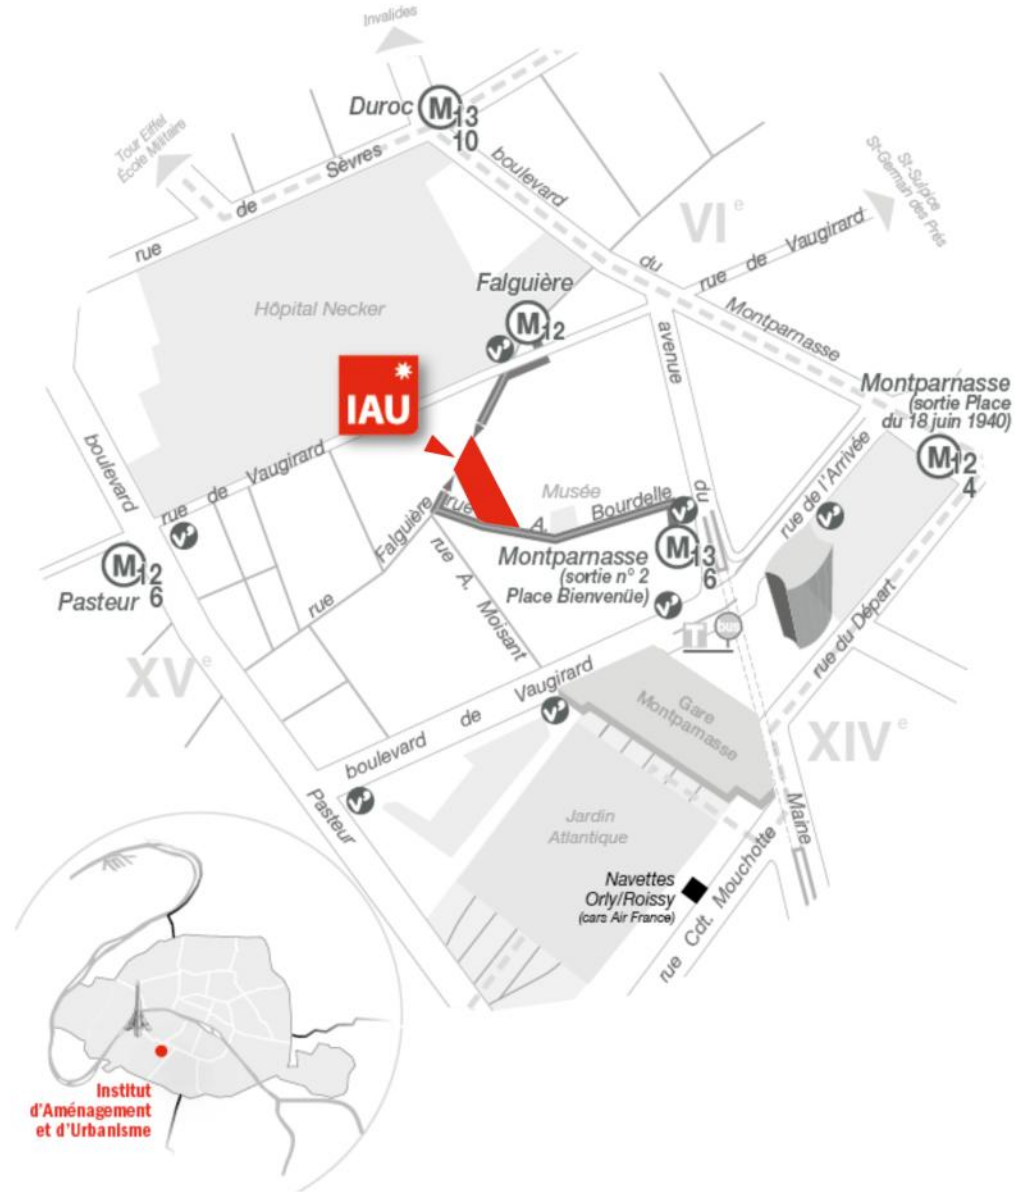

- Eleven stations connected to high-speed rail network (TGV).

#01 Location of IAU - MITI RC Paris IdF

IAU îdF in the heart of Montparnasse

- Offers a large hotel and restaurant
- Well served by public transport :
train, subway, buses, taxis,
self-service bikes (Velib'),
self-service cars (Autolib)

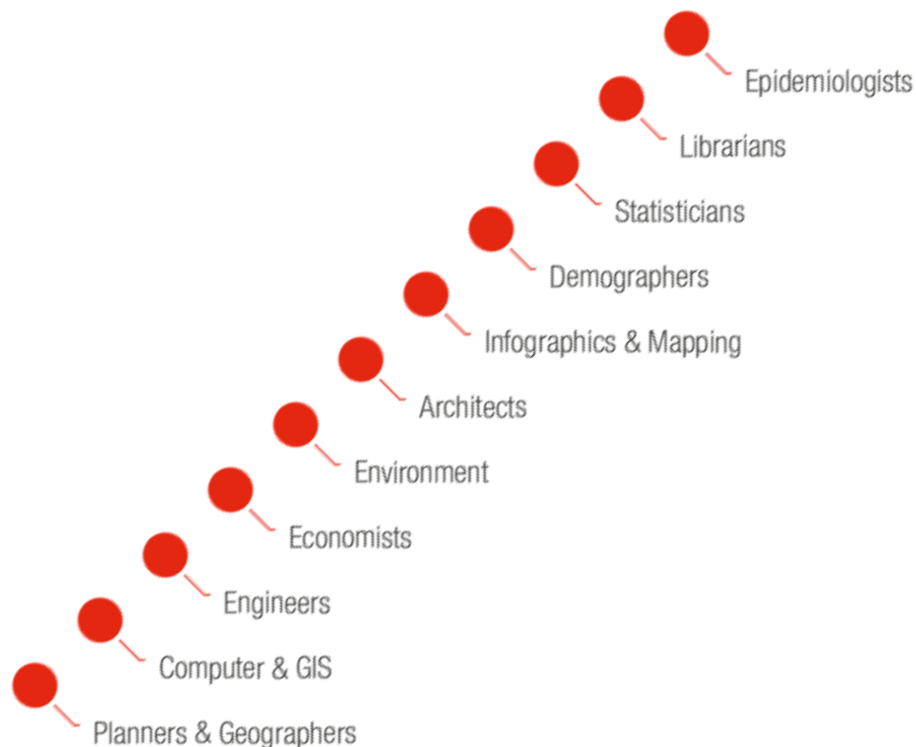

Expertise

Our Team

IAU île-de-France has a team of 200 people, comprising experts in a variety of fields. Our team is highly diverse in terms of educational background and practical experience and this gives us a strong fund of expertise to draw on, enabling us to cover a broad range of methods and products effectively.

Our practice

Fifty years' experience of urban planning in the French capital region gives us a vast fund of specialist expertise to draw on, making IAU île-de-France a major public agency with a unique ability to react to current issues and concerns. We are constantly working to identify emerging trends and innovative practices, and to explore the potential of future developments. With its international expertise and its wide-ranging network of contacts and connections IAU île-de-France is a truly unique organization.

International Action

IAU île-de-France has realized about 270 missions in 50 major urban areas worldwide.

Examples of its experience include :

- diagnosing metropolitan development;
- developing strategic planning documents;
- and transferring techniques for urban management.

Our key points are:

- a coordinated expertise capability in most of the fields of planning and development studies, this including technologies such as remote sensing, GIS, etc;
- an experience ranging from the municipal level to sub-regional, metropolitan and national territories;
- urban projects, development plans, strategic framework;
- a world-scale list of references in Middle East, Asia, Latin America and Africa, among which Cairo
- and Lebanon, Shanghai, Santiago, Morocco and Abidjan are some key points.

These activities abroad are carried out through contracts and consultancies ordered by foreign national and local authorities, and by french or international bodies (UNDP, IDB, WB...).

Networks

The IAU île-de-France always encouraged Networking and partnership.

From skills and experiences exchange arose a reflection resulting in action and projects.

For several years the network was widened to foreign partners of the metropolises.

- ▶ Information systems

#04 Facilities of IAU - MITI RC Paris IdF

Technical means

Five meeting rooms are booked from the intranet.

The room at the lobby is equipped with a sound control with the possibility of recording the proceedings.

#04 Facilities of IAU - MITI RC Paris IdF

A library open to the public

The media library of the IAU île-de-France puts at the users' disposal one hundred and fifty thousand multimedia documents on the fields of urban organization, architecture, local governments, environment, local finances, housing, landscape, nuisances, local public transports and town planning.

A document collection...

- 45,000 texts, works, reports, offprints;
- 3,000 IAU îdF survey reports;
- 2,000 maps, plans, atlases;
- 40,000 photos;
- 200 films and audiovisual documents;
- 1000 documentation files.

..to be consulted by

- Property developers, site managers;
- architects, town planners;
- elected officials;
- Librarians;
- academics, researchers;
- teachers and students...

#04 Facilities of IAU - MITI RC Paris IdF

Logistics adapted

For its operation, the Regional Center will have a secretariat and have access to all the equipment of the IAU IdF: internet connection, broadband, A3 color printers, plotter A0...etc.

A cafeteria located on the second floor offers hot drinks and snacks.

Skills of Communication Department may also be solicited

- Observatories and geographic information systems : tools for monitoring, evaluation and decision support, (2013)
- The strategic planning and the principles of the sustainable development, (2014)
- Adaptability and resilience of the metropolis about the climate change and the natural disasters. (2014)

But also,

- Urban regeneration and urban project approach,
- Articulation between public transport and urban planning,
- Protection and development of the natural and urban and cultural heritage,
- Reduction of unworthy housing,
- Participative democracy and role plays of the different actors of the urban development.

Other proposals are suggested:

- Study the feasibility of transformation some **Metropolis initiatives** in formations linked to the needs.
- Give a specific approach on the tools used in France and explain theirs applications (PPR, PNR, SCOT, PLU, PDU...).

These different training programs will be happened in two languages, according to the participants.

#06 Different forms of training programs

- Lecturing
- Technical exchanges
(Peer to Peer, Staff Exchange)
- Studying visits
- Internships short or medium term

The MIT/RC Paris IDF could offer one month to three months placements on specific topics if a detailed analysis has been done before.

Targeted audience

Member of Metropolis

The training program is primarily targeted to decision-makers, community leaders (elected representatives and executives), in charge of the planning and the management urban in the member cities of Metropolis.

Possibility of extension beyond the members

The idea to open the access of the training programs to the member cities which will be not member of Metropolis but which would express the wish to benefit from the training programs. This action of extension would be considered as an incentive measure to subscribe to Metropolis

Possibility of extension to the partners of the member cities and communities, associated with Metropolis

The extension of the associated organizations to the members of Metropolis (Agencies of town planning, public institutions of urban development) are also not limited by the institute and by its programs, they can participate in the training programs.

#08 Identification of potential partners

- **Technical partners (University, High School, institutions of professional training program)**

Among the public partners and the university partners proposed, the pole "Paris-East" which includes High School, the IFU, the IFSA... Other private partners are mentioned, such as Cisco (already partner of Metropolis), Veolia etc.

- **Financial partners (Metropolis, Donor Agencies, CMI, Ministry of Foreign Affairs, European Union, companies deprived)**

An approach of prospecting is to be implemented by the project team in order to estimate products and plans offered by the various aforesaid companies and the administrations and to propose the assembly of adapted operations of partnerships.

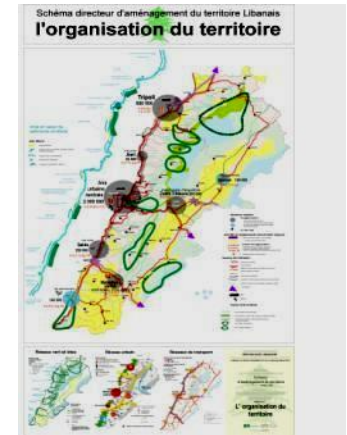

#09 Setting up of a communication strategy

metropolis ●

- Making up a file of the networks and the way of its updating
- Communication on the creation and the training program of the Paris IdF RC (vocation, concerned public, themes...)
- The role of the tools in the communication strategy (Internet, MITI website, Metropolis website, Ile-de-France region website, IAU îdF website...).
- The communication strategy will be refined according to the consultations of the general secretary of Metropolis and of the MITI HQ Seoul and the other Regional Centers.

- Experience and knowledge of the problems of planning and urban management at all scales from more than 50 years,
- Through the works conducted with the wide international networks of IAU-IDF, the regional center of Paris can invite pointed international specialists based on the selected training topics.
- Training methods mastered and adapted to diverse audiences through the practice of teaching of IAU-IDF experts in universities and the higher education establishments
- Multidisciplinary team of IAU-IDF brings a transverse view of technical approaches.

#11 weaknesses shared of the MITI network

- The issue of funding resources and their distribution
- The issue of promotion and the brand image, Identity of MITI
- Lack of awareness and contact with identified individuals representing members of Metropolis and the regional secretariats of Metropolis
- MITI needs to build partnerships with international agencies, with universities and large companies working in the field of urban services
