

**MOSCOW CITY PROGRAM
AT THE TENTH SESSION OF THE WORLD URBAN FORUM
ABU DHABI, UAE, 8–13 FEBRUARY**

**MOSCOW
JANUARY 2020**

Moscow is one of the fastest-growing cities in the world. The city is actively developing in a number of areas: the construction of new transport infrastructure, housing renovation and redevelopment of industrial zones, development of new entertainment, social and innovations infrastructure, and public spaces

The creation of new urban infrastructure that meets the highest requirements is a main topic of international dialogue and interaction between global cities and nations. Sharing expertise allows us to make our cities more attractive, more accessible, more inclusive, and more comfortable for their residents

The World Urban Forum is aimed at allowing major cities to share their experience with each other to try and find new solutions, create new opportunities for residents, promote a culture of innovation, and ultimately maintain sustainable urban development

'Moscow's experience can be useful to a lot of cities that UN-Habitat collaborates with. I suggest that Moscow shares its experience and expertise with other cities'.

Maimunah Mohd Sharif,
Under-Secretary-General,
the UN, Executive Director, UN-Habitat

After the meeting between the Mayor of Moscow and M.M. Sharif at MUF2019, UN-Habitat began working on a new format of cooperation between major global cities through the establishment of an association of global cities.

Moscow Urban Forum is official organizer and program developer of the Moscow Government stand.

MOSCOW TAKES PART IN WUF10 KEY SESSIONS AND RUNS AN OFFICIAL STAND WITH A BUSINESS PROGRAM

BUSINESS PROGRAM AT THE MOSCOW STAND

The Moscow government stand will host a number of sessions on the practices of urban transformations. The following key Moscow megaprojects will be presented: the Metro/MCC/MCD, My District program, Renovation program, Zaryadye Park, Luzhniki Sports Cluster and others. Russian and international experts will discuss urban transformation priorities, the experience of the already implemented projects, and future challenges.

MOSCOW SIDE EVENT AT WUF10 BUSINESS PROGRAM

The Government of Moscow and the Moscow Urban Forum will hold a special side event as part of the business program of WUF10. The side event will present the latest megaprojects that have helped to upgrade transport, residential and social infrastructure, making the city more technologically advanced, inclusive and sustainable.

PARTICIPATION IN THE KEY SESSIONS OF WUF10

The WUF10 business program will be attended by national and city leaders, heads of international organizations and leading sustainable development, culture and technology experts. Panel discussions, training workshops and round tables will cover issues of urbanization and its impact on cities, their economy, environment and culture.

Moscow Mayor S. Sobyanin has been invited to participate in the main program.
